

GroundStateEigensolver does not handle None aux operators

<https://github.com/qiskit-community/qiskit-aqua/issues/1474>

ROW 88

GroundStateEigensolver does not handle None aux operators #1474

Closed

#1477

MariaSapova opened on Dec 7, 2020

...

Information

- Qiskit Aqua version: 0.23.1
- Python version: 3.7
- Operating system: Ubuntu

What is the current behavior?

GroundStateEigensolver fails with None operators in aux_operators list. In VQE there is a special check for None operators, while in GroundStateEigensolver (AdaptVQE) they are directly passed to `_eval_op()`.

Steps to reproduce the problem

Please run the [gist](#)

What is the expected behavior?

Suggested solutions

In `ground_state_eigensolver.py` add None check to `def evaluate_operators` [here](#)

Summary

Fixes [#1474](#)

Details and comments

It is possible that an auxiliary operator becomes `None`. This case is handled gracefully by returning `None` as a result, too.

Basic unittests are added, too.

I fixed the mypy check but I am not quite sure what went wrong with the lint last time. Let's see what happens now...
